*Have you missed out
on your legislature's
\$20 million investment
opportunity?*

Since 1981, schools all over the state have received a portion of the five year accumulated \$20 million investment in school weatherization.

But, you haven't.

And if you qualify, we want you to.

Probably nothing is more intimidating than governmental forms and processes associated with getting a energy efficiency grant. That's why we've tried to simplify them.

And for the first time, we'll even pay up to \$2,500 for your technical assistance.

To get more information on how you can invest in your school district, just fill out the postage-paid card below and mail it.

You'll hear from us!

Yes, I want to invest in energy efficiency for my school. Please contact me.
