

Nebraska Gasoline and Diesel Prices

The state average retail price of gasoline increased 3 cents from last week to \$1.94. The state average retail diesel price jumped another 6 cents to \$2.05 per gallon with some help from Kearney who had an average of \$2.10 over the last three days of this week.

Midwest diesel fuel inventories are above the normal range for this time of year while the Gulf Coast and Rocky Mountain regions' inventories are low. Although both regional and national gasoline stocks remain tight, the Oil Price Information Service has predicted that comfortable levels could be coming this month.
