[Midseason Report](#)

## Analysis

The average wholesale [heating oil](#) price on February 8, 2010, had fallen nearly five cents from last week's report to \$1.94 per gallon (see the [table](#) at the end of this report). The [graph](#) below shows the spread in Nebraska prices from month to month and from this year compared to previous years.

The other [states](#) surveyed in the Midwest Region had comparable wholesale prices ranging from \$1.89 to \$2.03 per gallon resulting in a regional average of \$1.98. States near in proximity to Nebraska, such as Missouri and Minnesota, had prices of \$1.95 and \$1.94, respectively.

For the week ending February 5, the Midwest distillate inventory level was at the upper boundary of the normal range for this time of year at 1.4 million barrels.

Notes: The [annual report](#) for the 2008-2009 winter season is available. An [archive](#) houses annual reports from previous years.

## Heating Season

The Oil Price Information Service collects wholesale [heating oil](#) prices each week for Nebraska and twelve (12) other states in the Midwest Region during the heating season (October to March). The [Energy Information Administration](#), the independent statistical and analytical agency within the U.S. Department of Energy, uses the prices collected by the Oil Price Information Service to calculate a state average price, a regional average price, and a national average price which can be seen in the report [Wholesale Heating Oil Prices by Region and State](#).

## Off Season

Prices are not collected during the off season (April through September).

## Midwest Region

For statistical purposes, the Energy Information Administration defines the [Midwest region](#) to include the states of Iowa, Illinois, Indiana, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, and Wisconsin.
